

Using Garritan Personal Orchestra 5 Expression Maps in Dorico

Setup

- Install Garritan Personal Orchestra 5 on your computer.
- On Mac from the Finder menu choose Go > Go To Folder... then copy and paste this location and press the Go button:
~/Library/Preferences/VSTAudioEngine
On PC, browse to: C:\Users\<username>\AppData\Roaming\Steinberg\VSTAudioEngine_64
- Place the included vst2whitelist.txt file in the VSTAudioEngine folder. The whitelist file includes the codes for the ARIA Player VST and ARIA Player VST Multi
- When you start Dorico, the ARIA player for GPO5 will now be available.

How to use

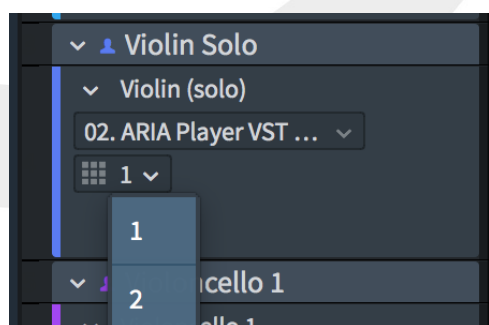

Once GPO5 is installed on your computer and you have an instance loaded in the Dorico VST Instrument rack in Play Mode (it will show as ARIA Player VST Multi), you can then assign any instrument to it.

2. Assign an instrument to use Aria

1. Add GPO / Aria player to the rack

Then assign it to a slot (1-16).

Then open the Aria player / GPO (by clicking on the 'e' button in the VST Instrument rack) and in the same slot number you chose in Dorico, load your chosen instrument.

For the Dorico expression maps to work, you will need to choose from the 'Notation' (not standard) list of instruments and choose one that ends 'KS' for key switch.

In Dorico, make sure you have the expression maps imported in Play > Expression Maps Setup and use the 'Import Library' button at the bottom of the dialog.

Then in the Dorico VST Instruments rack, click on the cog to the right of the 'e' for each slot, assign the correct expression map for the instrument(s) you chose in the Aria Player.

The Expression Map List section below shows which Expression Map to use with each of the notation instrument patches in GPO5.

For a full list of the available key switch effects available for each instrument patch, please see the Garritan documentation at: <https://usermanuals.garritan.com/GPO5/Content/directory.htm>

Expression Map List

Woodwinds

Instrument Patch	Expression Map Name
